

STAKEHOLDER MEETING

2015 OZONE STANDARD BOUNDARY DESIGNATIONS

YUMA AREA

Please join ADEQ to discuss 2015 ozone boundary recommendations for the Yuma Area. ADEQ finds it extremely helpful to have stakeholder involvement and input.

When: May 24, 2016, from 1:30 to 2:30 p.m.

Where: City of Yuma - Public Works Training Room, 155 W. 14th Street, Yuma, AZ 85364

The EPA recently revised the National Ambient Air Quality Standard (NAAQS) for ozone. More information on this action is available [here](#). This NAAQS revision requires the Governor to submit boundary recommendations as to whether certain areas within the state are attainment, nonattainment, or unclassifiable (inadequate data to make a determination) areas based on measured ozone concentrations and available data.

ADEQ is currently developing these boundary recommendations for the Governor and would like to consult with all affected stakeholders regarding areas in Yuma County. The Governor must submit these recommendations to the EPA by October 2016, which means ADEQ must publicly notice draft recommendations between May and June of 2016.

ADEQ looks forward to the opportunity to work with you.
